

Facility Services FUME HOOD PRE-WORK CHECKLIST

The Laboratory Supervisor is responsible for the completion of this checklist prior to the commencement of any maintenance activities on fume hoods. All non-shaded areas must be completed in full, then forward this form to Facility Services to schedule the work.

The Fume Hood Pre-Work Checklist will be posted on the fume hood for the duration of servicing by Facility Services. Upon completion, the checklist will be removed from the fume hood and Facility Services will contact the Laboratory Supervisor named below to confirm completion of the work order.

Please note: Should Facility Services determine that the work area presents a safety concern, work shall **not** proceed until resolution. This may involve an onsite meeting with the Laboratory Supervisor and EOHSS.
